Subscription Product Keys

Microsoft is providing you with these keys to install and activate the products listed below per the terms of the [End-User License Agreement](#). Any other use of these keys is prohibited.

Products That Require Activation:

- If you do not see your product key listed and would like to request a replacement or new key then continue on this page by using the "Request Keys" button on this page.
- You need a product key for each of the following products. Please check the box next to a product name and click the "Request Keys" button to obtain the key you need.
- Unless otherwise noted below, each product key will activate 10 PCs.
- Many products have a grace period allowing you to use the product before requiring activation. If you plan to reinstall within the grace period it is recommended that you not activate the installation.
- For frequently asked questions please refer to web site [FAQ](#).

Volume License Keys

Product Name	Product Keys	Key Type	Date Claimed (in UTC)	Unclaimed Keys	Remaining / Allowable Activations
<input type="checkbox"/> Windows Vista Enterprise	-	MAK	-	1	

[Request Keys](#)
[Export Key List to XML](#)

Volume License Key. To install specific licensed products you will need to use a Volume License Key (VLK). This

VLK is issued to your company for your exclusive use for each specific license purchase. VLKs must be used with the appropriate Volume License media. You agree to use your best efforts to keep a secure record of this product key including not disclosing this product key to any unauthorized third party. You may see VLKs for older product versions; this is to support downgrade rights under the license agreement where customers can acquire the latest version of a product and use an older version.

VA 1.0 – Volume Activation 1.0 is the first generation of VLKs. This key bypasses product activation.

VA 2.0/KMS – Volume Activation 2.0/Key Management Service: this key will be used to enable a new service in your environment that will automatically activate Windows Vista computers. You must have a minimum of 25 Windows Vista computers connected together to use the KMS, and all computers will be required to check back to the central service twice per year to stay activated.

VA 2.0/MAK – Volume Activation 2.0/Multiple Activation Key: this key will activate Microsoft Windows Vista through the internet or telephone, and have a limited number of activations associated with them. Computers can be activated on an individual basis or by a central computer which can activate multiple computers at a time.

For more information about Volume License Keys, including additional information on key types, best practices, and deployment options, go to: <http://www.microsoft.com/licensing/resources/vol/default.aspx>.
